

2015 Project Assessment Criteria

Domain & Weight	Score				
	0	1	2	3	4
Identification of Area of application (10%)	<ul style="list-style-type: none"> Area identified does not necessarily need NLP 	<ul style="list-style-type: none"> Area identified does not necessarily need NLP but NLP techniques can be used. Context of application is superficial 	<ul style="list-style-type: none"> Known NLP application area Context of application is superficial 	<ul style="list-style-type: none"> 1 or 2, the context of application is not superficial but it is not interesting. 	<ul style="list-style-type: none"> 1 or 2, and the choice of the context of application is interesting.
Choice of NLP techniques (25%)	<ul style="list-style-type: none"> NLP techniques arbitrarily chosen. NLP techniques chosen are not appropriate for the application chosen. 	<ul style="list-style-type: none"> NLP techniques arbitrarily chosen. NLP techniques appropriate for the application chosen. 	<ul style="list-style-type: none"> Evidence of alternative NLP techniques considered. Choice of NLP techniques poorly justified. 	<ul style="list-style-type: none"> Evidence of alternative NLP techniques considered Justification of why the NLP techniques were chosen is sound. The NLP techniques chosen are not appropriate for the application. 	<ul style="list-style-type: none"> Evidence of alternative NLP techniques considered Justification of why the NLP techniques were chosen is sound. NLP techniques chosen were appropriate for the problem
Design and modelling of the system and its components (15%)	<ul style="list-style-type: none"> No use of formal techniques in modelling the linguistic phenomena being investigated 	<ul style="list-style-type: none"> There is evidence of use of formal languages in modelling the linguistic phenomena The choice of formal language is poor The techniques for modelling linguistic phenomena are not correctly applied 	<ul style="list-style-type: none"> There is evidence of use of formal languages in modelling the linguistic phenomena Correct formal language chosen. The techniques for modelling linguistic phenomena are not correctly applied 	<ul style="list-style-type: none"> 	<ul style="list-style-type: none"> There is evidence of use of formal languages in modelling the linguistic phenomena Correct formal language chosen. The techniques for modelling linguistic phenomena are correctly applied

<p>Implementation</p> <p>(15%)</p>	<ul style="list-style-type: none"> No evidence of an attempt to implement the solutions 	<ul style="list-style-type: none"> Evidence of an attempt to implement the solution. No evidence of Software reuse through use of APIs 	<ul style="list-style-type: none"> Software reuse through use of APIs Implementation not complete but some components could be demonstrated 	<ul style="list-style-type: none"> Software reuse through use of APIs Implementation almost complete 	<ul style="list-style-type: none"> Software reuse through using APIs Implementation complete and can be demonstrated
<p>Empirical evaluation of the NLP system</p> <p>(25%)</p>	<ul style="list-style-type: none"> No evidence of a plan to experimentally evaluate the NLP system 	<ul style="list-style-type: none"> Evidence of plan to evaluate the system. The evaluation method chosen is inappropriate for the application. 	<ul style="list-style-type: none"> Evidence of plan to evaluate the system. The evaluation method chosen is appropriate for the application 	<ul style="list-style-type: none"> The evaluation method chosen is appropriate for the application Some results of the evaluation could be shown Experimental setup had some flaws 	<ul style="list-style-type: none"> The evaluation method chosen is appropriate for the application Results of the evaluation could be shown Experimental setup was good Ability to interpret the results
<p>Cross Field Skills</p> <p>(10%)</p> <p>1. team work</p> <p>2. Presentation skills</p> <p>3. critical thinking skills</p> <p>4. problem solving skills</p>	<ul style="list-style-type: none"> none of the four skills is exhibited 	<ul style="list-style-type: none"> 1 skill is exhibited 	<ul style="list-style-type: none"> 2 skills are exhibited 	<ul style="list-style-type: none"> 3 skills are exhibited 	<ul style="list-style-type: none"> All skills are exhibited
